

MFT

Command™ Center

Single Point of Control for All Enterprise File Transfer

Centralized management, control, and audit

MFT Command Center™ provides a single point of control to manage all of your enterprise file transfers, both inside and outside the enterprise, and across all major platforms (from Windows to the Mainframe). Command Center serves as the digital dashboard into your entire network; using a standard Web browser, administrators can review and control all file-transfer activity – whether it be internal transfers across the extended enterprise, or external transfers with customers, suppliers and business partners (B2B).

Complete Audit and Compliance: Keep a Pulse on Enterprise File Transfer

In a typical network, file transfer activity is happening 24x7. Many times, it includes high volume file transfers, very large files, and users and systems spread across a broad geographic area. Command Center gives your organization centralized access to logs of each and every transfer-related event at the local and central level, and produces detailed reports of every aspect of those transfers. Real-time alerts can notify your personnel instantaneously as circumstances warrant so that issues can be resolved quickly. In addition to a standard set of detailed audit reports, delegated administration and an extensive set of online inquiry tools supports ongoing operational and management needs. Having these tools centrally available at all times enables your organization to achieve total control of enterprise file transfer, while maximizing efficiencies and helping satisfy compliance mandates.

Key Benefits:

Centralized Management

Provides a single point of control for all enterprise file-transfer activity. All activity can be managed and controlled from a Web browser.

Security

Complete data security and support for the world's most stringent encryption standards.

Full Audit and Reporting

A full suite of online inquiry tools deliver powerful audit and reporting functionality.

Delegated Administration

Delegated administration means users can be empowered based on their role within the organization.

High Availability/Clustering

Supports clustering for failover support and reliability.

Real-Time Alerts

Send messages and alerts by phone, e-mail, or mobile device.

Specifications

Platforms

- Unix (IBM AIX, HP-UX, SUN Solaris)
- Windows XP SP3
- Windows Vista SP1
- Windows 7
- Windows 2008 and 2008 R2 (32 & 64 Bit)
- Linux
- zLinux
- VMware

Compliance

- Detailed Auditing
- Section 508 Compliant
- Support for PCI, Sarbanes-Oxley, HIPAA, GLBA
- Embedded Crystal Reports
- Customizable Reports
- Integration with Existing Reporting Tools

Security

- X.509 Certificates Support
- Public/Private Certificate Support
- LDAP Authentication (including Active Directory)
- Support for Web SSO Solutions
- FFIEC Approved Two-Factor Authentication
- Time of Day Access Controls
- FIPS 140-2 Compliant
- User, Group, or Department Administration
- Centralized Data Repository Not Required
- Built-In Authentication Repository
- UserID/Password & Certificate Authentication
- Proxy Accounts

Integration

- Web Services Architecture
- LDAP Support
- API Support

- SOAP Interface
- User Exit Support
- Post Processing Actions
- Straight-Through Processing
- Enterprise Application Integration
- Rules Based Routing
- Rules Based Processing of Data
- Rules Based Alerts

Encryption

- SSL v.3 Support
- Integrated PGP Support

Management

- Delegated Administration
- SNMP Trap Support
- Centralized Administration of All Components
- Heartbeat Technology
- Service Status Monitoring / Notification (Internal/External)

Automation

- E-mail Notification
- Automated Alerting Options (E-mail, SNMP, JAVA Class, Initiate External Process)

Database Support

- Microsoft SQL Server
- Oracle
- MySQL
- DB2

Interface

- Browser Client
- GUI Client
- Command-Line Client
- Customizable Web Interface

Architecture

- J2EE-Based Architecture
- JDBC Compliant

- Java Based (Platform Independent)
- Online Help

Browser Support

- Internet Explorer
- Firefox
- Safari

TIBCO Software Inc. (NASDAQ: TIBX) is a provider of infrastructure software for companies to use on premise or as part of cloud computing environments. Whether it's efficient claims or trade processing, cross-selling products based on real-time customer behavior, or averting a crisis before it happens, TIBCO provides companies the two-second advantage™ – the ability to capture the right information, at the right time, and act on it preemptively for a competitive advantage. More than 4,000 customers worldwide rely on TIBCO to manage information, decisions, processes, and applications in real time. Learn more at www.tibco.com.
